

► RC-400^e - Universal Cabinet

Expand  Evolve

**NEW X-Large
Base Holds
125Ah batteries!**

***Engineered to maximize the performance
& life of your network, in the most
extreme elements.***

Simple Economics ▼

ICBS OSP cabinets are fully featured and ideal for low to medium density deployments, which economically fill the gap in a 120 to 400 line application. Features such as a heat exchanger that dissipates over 1800 watts of thermal heat make it the perfect choice for heavy broadband installations requiring optimal DSL & Video Service in the harshest environments.

Network Integration & Installment Options

- Pre-wired - Basic cabinet pre-wired for your manufacturer and model of equipment.
- Equipment Integration - Cabinet fully integrated with your choice of manufacturer's equipment, wired and ready to connect to your existing pad, base, pole, or H mount.
- Recognized, Approved, and Certified to systems integrate Triple Play applications by leading manufactures.
- Custom Engineering – Cabinet engineered to your specifications utilizing our in-house engineering department and TEO design software.
- Installation – On-site cabinet installation

Features ▼

- Interchangeability – AFC RSC-120
- X-Large Base – Holds 125Ah Batteries
- Expandable – Allows customers to optimize and expand existing AFC infrastructure by:
 - Utilizing the same pad or base of an RSC-120 cabinet
 - Expansion from 120 to 400 lines.
- Universal Design – Allows you to easily switch between various NextGen DLC manufactures.
- Remove and Install new manufacture's equipment with capability to retain and reuse existing peripheral equipment such as Valere rectifiers, etc...
- Corrosion Resistant – All aluminum and stainless construction with 15 year warranty provides durable corrosion resistance including costal environments.
- Stackable Battery Bases – Easily add as many batteries as required by your application.
 - Battery capacity up to 250 AMP hours for higher battery backup requirements
- Heat Dissipation – Efficient heat dissipation of 1800 watts to accommodate heavy broadband applications.
- Convenient Connections – Fiber, Cat 3, Cat 5, MS2 or 710.
- Warranty Friendly – Cabinet has been recognized by leading DLC manufactures to house their equipment.
